

The Productive Environment Process™

1. State Your Vision. What does a productive environment look like, feel like? What will be different?

2. Identify Your Obstacles What might cause roadblocks or hinder your success?

3. Commit Your Resources. What resources, such as time, do you have to commit ? Have you considered your budget? Are there others who can help you? What tools do you already have?

4. Select Your Tools/Processes. We will help you develop a productive environment GamePlan™, recommend tools, and create a SYSTEM to support your vision.

5. Maintain Your Success. Does it work? Do you like it? Does it work for the others? If the answer is “no” to any of these questions, we will revisit the 4 questions above and continue to fine tune your system.
